**Version:** 4 **Date:** 19 January 2010

### **Author's response to reviews:**

here is our Implementation Science paper. I agree with all of your edits except 1. The official title of the journal that comes from the Canadian Medical Association is now CMAJ. It used to be the longer version but they have switched--just as BMJ and JAMA did a few years back.

I found a very few minor edits that I have addressed. I accepted all of your changes.

Thanks again.

Ann
