### **Author's response to reviews:**

Dear Editor

I received revisions from your copyeditor last week and am now submitting a revised set of final documents responding to these copyediting revisions. Please note that I couldn't find any suggested revisions for Figure 2 in the file that was sent to me. I also did not receive a file with Table 2 for any revisions. Please let me know if you have any questions or if there are any outstanding revisions I may have missed. Thank you.

Natalie Leon
