

## **Reviewer's report**

**Title:** A pragmatic cluster randomised controlled trial of a Diabetes REcall And Management system: the DREAM Trial [ISRCTN32042030].

**Version: 2 Date:** 15 December 2006

**Reviewer:** Patrick O'Connor

### **Reviewer's report:**

General

This is clearly an important study worthy of publication.

However, the abstract should perhaps be toned down a bit. Perhaps the intervention "improved SOME aspects of diabetes care."

I think this attenuated language is more consistent with the observed pattern of mostly negative impacts.

**What next?:** Accept after minor essential revisions

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.
