

Reviewer's report

Title: Development of evidence-based clinical practice guidelines (CPGs): comparing approaches.

Version: 3 **Date:** 16 June 2008

Reviewer: jean R slusky

Reviewer's report:

This is a much improved manuscript and the author's have been responsive to critiques. However, I still believe they should add a comment in the limitations section that they search criteria created a geographical restriction by eliminating most North American manuals and the authors may have included the manual for the U.S. Preventive Services Task Force (<http://www.ahrq.gov/clinic/uspstmeth.htm>)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
